

CURRICULUM GUIDES AND COURSE OUTLINES

The recommended curriculum guides published by the State Department of Education will be used in the division; however, in most subject areas it is desirable to locally prepare supplemental curriculum guides. In subjects not listed by the State Department of Education, local guides must be prepared and approved by the state office.

Teachers, in conjunction with curriculum specialists, will be called upon to develop or rewrite curriculum guides under the guidelines provided by the office of instruction. Curriculum guides will be located in each school by appropriate content or subject matter.
