

## STUDENT WELLNESS

### I. Policy Statement

The Waynesboro School Board recognizes the link between student health and learning and desires to provide a comprehensive program promoting healthy eating and physical activity in division students.

### II. Goals

The Waynesboro School Board has established the following goals to promote student wellness.

#### A. Nutrition Promotion and Education

Students receive nutrition education that teaches the skills they need to adopt and maintain healthy eating behaviors.

Nutrition education is offered in the school cafeteria as well as in the classroom, with coordination between the foodservice staff and other school personnel, including teachers.

Students receive consistent nutrition messages from all aspects of the school program.

Division health education curriculum standards and guidelines address both nutrition and physical education.

Nutrition is integrated into the health education or core curricula (e.g., math, science, language arts).

Schools link nutrition education activities with the coordinated school health program.

Staff who provide nutrition education have appropriate training.

Schools nutrition education activities and promotions for students will involve parents and community agencies as appropriate.

The level of student participation in the school breakfast and school lunch programs is appropriate.

Schools nutrition education activities and promotions for students will involve parents and community agencies as appropriate.

## Physical activity

The Waynesboro school division has a goal of making a program of physical fitness available to all students for at least 150 minutes per week on average during the regular school year. Such program may include any combination of physical education classes, extracurricular activities, and other programs and physical activities. The division's goal for the implementation of its physical fitness program is committed to providing a school environment that enhances learning and development of lifelong wellness practices that promote student health, prevent childhood obesity, and combat problems associated with poor nutrition and physical inactivity.

To accomplish these goals:

Students are given opportunities for physical activity during the school day through physical education (PE) classes, daily recess periods for elementary school students, and the integration of physical activity into the academic curriculum where appropriate.

Students are given opportunities for physical activity through a range of before-and/or after-school programs including, but not limited to, intramurals, interscholastic athletics, and physical activity clubs.

Schools work with the community to create ways for students to walk, bike, rollerblade or skateboard safely to and from school.

Schools encourage parents and guardians to support their children's participation in physical activity, to be physically active role models, and to include physical activity in family events.

Schools provide training to enable staff to promote enjoyable, lifelong physical activity among students.

### B. Other school-based activities

An adequate amount of time is allowed for students to eat meals in adequate lunchroom facilities.

All children who participate in subsidized food programs are able to obtain food in a non-stigmatizing manner.

The availability of subsidized food programs is adequately publicized in ways designed to reach families eligible to participate in the programs.

Environmentally-friendly practices such as the use of locally grown and seasonal foods, school gardens, and non-disposable tableware have been considered and implemented where appropriate.

Physical activities and/or nutrition services or programs designed to benefit staff health have been considered and, to the extent practical, implemented.

### C. Nutrition Guidelines

Generally

Nutrition guidelines have been selected by the division for all foods available on every school campus during the school day. The objectives of the guidelines are to promote student health and learning and reduce childhood obesity.

- Foods and beverages made available on school grounds during the school day will be consistent with the current Healthy, Hungry-Free Kids Act standards and adhere to food safety and security guidelines.
- Reward systems that include food and physical activity will promote student health.
- School-based activities will be consistent with division wellness goals.

Nutritional standards for the school breakfast and school lunch programs that meet or exceed state and federal standards are in place.

The nutritional content of foods and beverages donated for class parties or other school events will be considered.

School-based marketing of foods and beverages, such as through advertisements in school publications, school buildings, athletic fields, and/or other areas accessible to students, and activities such as incentive programs, will be considered.

Outreach strategies to encourage families to reinforce and support healthy eating and physical activity are in place.

### III. Implementation

The School Board encourages parents, students, representatives of the school food service program, teachers of physical education, school health professionals, school

administrators, and the general public to participate in the development, implementation, and periodic review and update of this policy.

The Director of Student Services in collaboration with the Coordinator of School Nutrition, will be responsible for overseeing the implementation of this policy and will develop procedures for evaluating the policy, including indicators that will be used to measure its success. The public, including parents, students, and others in the community, will be informed and updated about the content of implementation of the policy.

Implementation procedures will include periodically measuring and making available to the public an assessment on the implementation of the policy, including the extent to which schools are in compliance with the policy, the extent to which this policy compares to model school wellness policies, and a description of the progress made in attaining the goals of the policy.

Adopted: February 9, 2016
